Education

Carnegie Mellon University   **Mountain View, CA**
Master of Science in Software Engineering; GPA: 4.0/4.0   *Aug 2022 - Dec 2023*
Courses : Foundations of Software Engineering, HCI & User Experience, Data Science for Software Engineering

NMAM Institute of Technology   **Nitte, India**
Bachelor of Computer Science; GPA: 9.8/10 (top 1%, Class of 2020)   *Jul 2016 - Apr 2020*
Courses : Data Structures & Algorithms, Object Oriented Modelling & Design, Software Architecture, DBMS

Experience

Team AIBOD Inc.   Fukuoka City, Japan
Software Engineer II   *Nov 2021 - Apr 2022*

- Implementing a Search System using GraphQL, PostgreSQL, and React resulting in highly efficient data retrieval.
- Led the end-to-end development of a RESTful payment microservice with Python, Flask, and PostgreSQL, resulting in the expansion of customer base, contributing to ∼¥500K increase in annual revenue.
- Containerized and deployed applications using Docker, set up AWS Cloudwatch for remote monitoring of unmanned stores across 5 customer locations, ensuring smooth and efficient operations.
- Developed a component library with React, CSS and TypeScript for an unmanned store, enhancing accessibility through an intuitive interface, accelerating UI development and streamlining the overall development process.

Software Engineer I   *Jul 2020 - Oct 2021*

- Set up a Jenkins pipeline for CI/CD as well as a Slackbot to take early action on failures. This helped reduce the build failure frequency by 50%
- Reduced the number of API calls by 30% through the implementation of Redux for simplified state-management.
- Introduced unit and integration tests with Jest which improved team efficiency and reliability with over 80% coverage
- Created a Python script and a GUI-tool using Tkinter for annotating and visualizing images that improved the data pre-processing rate from 20 to 200 images/hour and enhanced team productivity.

Data Science Intern   *Feb 2020 - Jun 2020*

- Applied Feature Engineering to improve the accuracy of a KNN-supervised classifier by 7%, resulting in more effective classification of products in an unmanned store.
- Used BERT and PyTorch to automate support request routing in an apartment intercom system by recognizing named entities. Integrated the trained model with the Express API Server to provide AI as a Service.
- Resolved more than 20 bugs in the API server using NodeJS and TypeScript, resulting in improved stability and performance of the server, also contributed to ongoing full-stack applications.

Projects

Incident Response | ***AWS, Docker, React, MongoDB, Jenkins, Jira*** | <u>Link</u>   *Feb 2023 - Present*

- Built a mobile communication platform for citizens and first responders during emergency situations. Migrated the codebase from MaterialUI to AntDesign and led the frontend development efforts in a scrum-of-scrums environment. Deployed the app using Docker, Jenkins and AWS.

Refriendo | ***Golang, TypeScript, React, CSS, Figma, Git***   *Oct 2021 - Jul 2022*

- Implemented a cross-platform Event Management Application for both Android and iOS using React and Ionic Capacitor. Supported backend development for a RESTful Server with Golang

Skills

Languages   : Golang, GraphQL, TypeScript, HTML5, CSS3, JavaScript, Python, Java, SQL, C++
Frameworks : React, Redux, NextJS, jQuery, Ajax, Bootstrap, Tailwind, NodeJS, Flask, Express
Tools   : AWS (EC2, Cloudwatch), Amazon S3, Figma, Storybook, Jenkins, Docker, PostgreSQL, MongoDB,
Postman, Git

Leadership

Graduate Teaching Assistant : Foundations of Software Engineering at Carnegie Mellon University.
Student Leader : ECE Graduate Organization at Carnegie Mellon University (Among 160 students).
